EDUCATION

Stevens Institute of Technology, Hoboken, NJ
M.S. Business Analytics and Artificial Intelligence
Concentration: Applied Analytics and AI

Expected Dec. 2026
(GPA: 3.918/4.0)

The College of New Jersey, School of Education, Ewing, NJ
B.A. History and Secondary Ed.
Summa Cum Laude

Dec. 2023
(GPA: 3.95/4.0)

SKILLS

Python • OpenAI / Claude API • Spec-Driven Development • Model Context Protocol (MCP) • Agent Development • GitHub Copilot • SQL Server • Power BI • Scrum • Agile • Excel • Staff Training • Project Management • FastAPI

EXPERIENCE

Verisk, Jersey City, NJ
Business Analyst Intern

Summer 2026

- Investigated workflow bottlenecks in the Scrum team's story-creation process and built an AI agent using Claude that translates plain-language feature requests into structured Jira user stories, enabling spec-driven development across the team.

Lightbridge Academy (Remote)
AI Integration Consultant

Mar. 2026 – Jun. 2026

- Built a machine learning-based staff scheduling optimizer predicting classroom attendance with under 3% error, reducing staffing costs 3–4% per center annually (six figures company-wide) while keeping implementation costs minimal by leveraging the company's existing subscription tools.

Fair Lawn Public School, Fair Lawn, NJ
High School History Teacher

Sep. 2024 – Jun. 2025

- Designed and delivered professional development focused on leveraging AI in education; trained 70+ educators across two sessions and was re-invited based on program impact.
- Increased Student Growth Objective (SGO) scores by 783% by designing and implementing targeted instructional interventions.

Montville Township Parks and Recreation Department, Montville, NJ
Assistant Director, Head Counselor, Counselor

Summers 2017-2025

- Redesigned data collection and reporting workflows, reducing administrative labor hours by more than 100%.
- Managed daily scheduling and resource allocation for 100+ participants and staff using Excel and Google Workspace, adjusting operations to meet evolving program demands.
- Led seasonal staff training and streamlined cross-team communication.

PROJECTS

Jira Story-Generation Agent | Verisk

- Designed an AI agent that ingests plain-language feature requests and generates structured, ready-to-groom Jira user stories, standardizing story quality and shortening backlog-grooming time.
- Coordinated with the development team to sync with another agent to pull defined business stories and generate specs directly into the team's development workflow.

Insurance Risk Advisor | Academic Project

- Built an LLM-assisted workflow where a user describes a driver and vehicle in natural language, the LLM calls a pre-trained Random Forest or Multiple Linear Regression model, and the model's predicted claim likelihood and premium are used to present a plain-language recommendation for a human to act on.
